

COMMUNITY SOLAR ENERGY RATE RIDER

CS-2

Effective January 1, 2022

AVAILABILITY:

Available throughout the Cooperative's service area from existing lines of adequate capacity subject to subscription limitations.

APPLICABILITY: Applicable, upon request, to customers currently receiving service through the Residential Service tariff.

TYPE OF SERVICE:

Community Solar (CS) is a tariff that enables customers to purchase a monthly subscription block of the energy produced from a portfolio of Coastal Electric Cooperative's (The Cooperative) solar facilities. Individual block subscriptions will be measured in two (2) kilowatt (kW) increments with a customer subscription maximum limited to two subscription blocks (4 kW).

The monthly CS subscription charge will be in addition to the customer's normal cost of electricity pursuant to their existing Residential Service tariff. The Cooperative will offset the customer's purchase of delivered energy by the amount of energy produced at the solar facilities supplying the CS program equivalent to the customer's participation level. The monthly production of the customer's subscribed blocks will vary from month-to-month based on output from the solar facilities supplying the CS energy. If the solar production kilowatt-hours (kWh) from the customer's subscribed blocks in the current month is greater than the customer's current monthly electric usage, then the customer will receive a credit at the Cooperative's solar avoided cost according to the current tariff.

Service to the customer will continue to be provided on a network basis from all energy resources generating into or otherwise supplying the Cooperative's power supply system. Based on the structure of the program, a customer should anticipate the CS charges to participate in the program will exceed any bill credits received. Bill credits can only be used to offset customer charges for electric service within the month the credits are produced and cannot be monetized or transferred.

MONTHLY RATE: Community Solar Charge \$25.00 per two (2) kW block.

SUBSCRIPTION TERMS AND CONDITIONS:

The subscription will automatically renew on a month-to-month basis, unless the customer provides notice of cancellation at least 30 days prior to the next billing cycle. The customer may reduce their CS subscription level or end participation at any time. Program pricing and availability will be reviewed on a periodic basis. The Cooperative reserves the right to cancel all contracts and sales through this tariff without penalty.

Customer acknowledges and agrees it has no rights in or claims to Renewable Energy Credits (“RECs”), or any credits, benefits, emissions reductions, offsets and allowances, howsoever entitled, resulting from the avoidance of the emission of any substance to the air, soil or water at or by Cooperative generating facilities through reduced generation of energy or other savings or offsets on account of the CS Program. Subscriber will not claim rights to or ownership of any environmental attributes or RECs.
